SECTION 01

EXECUTIVE SUMMARY & KEY BENEFITS

Lifepius Model Pharma With POS is a comprehensive, enterprise-grade point-of-sale and pharmacy management system designed to optimize retail operations, track inventory with absolute precision, and streamline daily transactions.

 CORE SYSTEM ADVANTAGES

- Advanced stock & inventory control with expiry tracking, variants, and multi-warehouse support
- Modern POS interface with multi-currency and payment gateway integration
- Smart dashboard with real-time analytics and reporting
- Built-in HRM module (attendance, payroll, departments)
- Basic accounting system with bank transfers and balance sheet
- Multi-language, multi-currency, and GST-ready system
- Hardware support: barcode scanners, receipt printers, and weight scales

SECTION 02

DASHBOARD & CORE ANALYTICS

 REAL-TIME METRICS ■ Sales, purchases, returns, and profit overview ■ Live synchronization across multiple branches	 DATA VISUALIZATIONS ■ Monthly charts and cash flow analytics ■ Top-selling products insights ■ Recent activities (sales, purchases, quotations)
---	--

SECTION 03

PRODUCT MANAGEMENT & INVENTORY

MODULE COMPONENT	CAPABILITIES & FEATURES
 Product Catalog & Types	■ Support for standard, digital, combo, and service products ■ Advanced variant creation and management ■ Multiple product images & units assigned per item
 Tracking & Logistics	■ Batch/expiry tracking strictly enforced ■ IMEI/serial tracking for specialized hardware/equipment ■ Weight scale integration directly into product flow
 Stock Transfer & Adjustments	■ Multi-warehouse stock transfers and routing ■ Stock counting & adjustment tools ■ Bulk stock updates executed rapidly via CSV
 Pricing & Barcoding	■ Tax, GST, and promotional pricing layers ■ Automated barcode printing pipeline ■ CSV import/export functionality

SECTION 04

SALES, POS & PURCHASE PIPELINES

SYSTEM VECTOR	EXECUTION PARAMETERS
 Sales & POS System	■ Touchscreen-friendly POS interface built for speed ■ Installment payment support ■ Coupons, discounts, taxes, shipping, and gift cards ■ Draft / hold / suspend sales workflow ■ Multiple payment methods & gateways ■ Email & WhatsApp receipts ■ Customer display support and sales commission agents ■ Advanced search (name, SKU, serial, variant) ■ Dynamic Retail & wholesale pricing
 Purchases Pipeline	■ Vendor and purchase order management ■ Purchase returns, taxes, discounts, and shipping overhead ■ Document uploads & CSV import ■ Purchase payments & attachments logging

OPERATIONS (MANUFACTURING, ACCOUNTS, HR)

PRODUCTION / MANUFACTURING

- Combo product production via detailed Bill of Materials (BOM)
- Ingredient-based stock deduction (live tracking)
- Automatic finished goods stock increase upon completion

ACCOUNTING MODULE

- Bank accounts setup & transfers
- Automated balance sheet generation
- Auto-linked financial transactions reducing manual entry errors

HRM SYSTEM

- Employee records & distinct department management
- Automated payroll management routing
- Attendance, holidays & leave tracking protocols

PEOPLE MANAGEMENT

- Customers & suppliers managed within a unified system
- Opening balances & due tracking enforcement
- Bulk messaging capabilities via WhatsApp API

REPORTS & ANALYTICS

The system features deep analytical reporting including: Sales, purchase, profit/loss reports, Customer & supplier reports, critical stock expiry alerts, daily targets & performance reports. All data is exportable via CSV/PDF with complex filter sets.

SYSTEM SETTINGS & GLOBAL CONFIGURATION

SETTING DOMAIN	CONFIGURATION SCOPE
 Core Settings	■ Invoice customization (browser/direct printing rules) ■ Roles & permissions system (granular access control) ■ Tax configuration mapping ■ Custom fields deployment ■ Discount plans structural mapping
 Integrations & Global Ready	■ SMS integration native APIs (Twilio, Clickatell) ■ Secure backup & restore system ■ Dark mode & layout settings switch ■ Global Ready: Fully localization-ready for global usage including Multi-language, multi-currency, and robust GST frameworks.
